

Innovative Turn-Key Dairy Barn Construction.

**Fully customizable to local needs,
anywhere in the world.**

Building a strong future together.

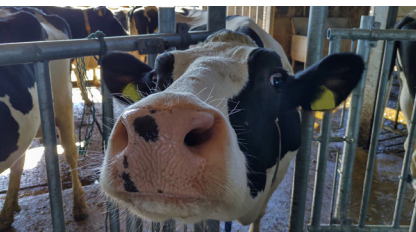

Agricultural solutions since 1931

Your trusted partner in turn-key dairy farm construction

Wopereis is specialized in turn-key dairy farm construction, fully customized solutions for dairy farmers around the world. We deliver complete projects from design to completion, fully tailored to your local needs, anywhere in the world.

Our commitment to quality, sustainability, and customer satisfaction ensures that every project is executed efficiently, cost-effectively, and to the highest standards.

At Wopereis, we combine craftsmanship with advanced technologies to bring your vision to life.

Complete Turn-Key Solutions

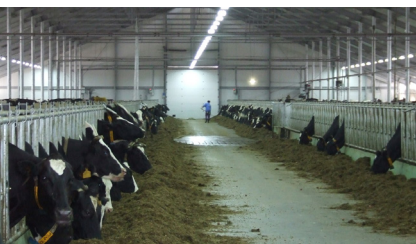

We offer a seamless turn-key approach, handling everything from initial planning and design to construction and final handover, ensuring a hassle-free experience for our clients.

Tailored to Local Needs

Our projects are fully customized to meet local regulations, climate conditions, and farming practices, providing a perfect fit for any location around the world.

Cutting-Edge Technology

We utilize the latest technologies in barn construction, including advanced ventilation systems, automated feeding, and energy-efficient designs, enhancing farm productivity and animal welfare.

Sustainable Practices

Committed to sustainability, we employ eco-friendly materials and energy-saving techniques, reducing environmental impact and promoting long-term farm viability.

Expertise and Experience

With over 90 years of experience and a team of highly skilled professionals, we deliver top-quality construction projects, backed by extensive industry knowledge and expertise.

Quality Assurance

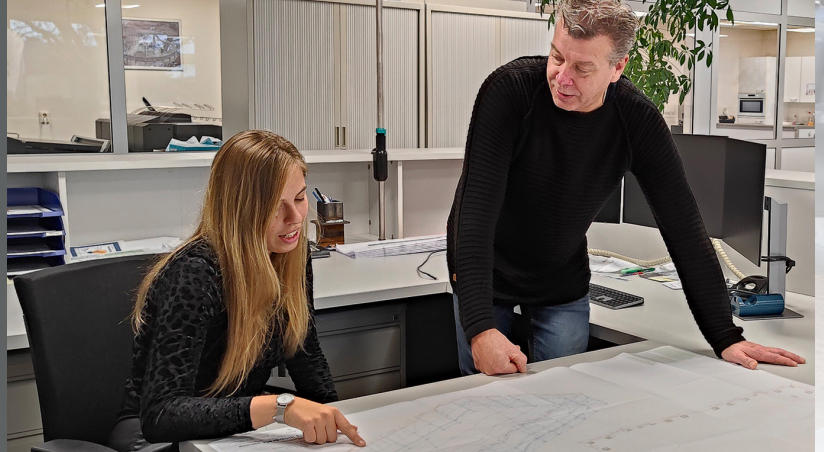

Our stringent quality control processes ensure that every aspect of the construction meets the highest standards, guaranteeing durability and reliability.

Efficient Project Management

Our efficient project management ensures that projects are completed on time and within budget, minimizing disruptions to farm operations.

Client-centric approach

Customized agricultural construction solutions for optimal performance

Every agricultural building is unique, and at Wopereis, we understand this better than anyone. When it comes to designing and constructing agricultural facilities, we always focus on finding the best solution for our clients. We take into account the specific requirements and conditions of each location, no matter where in the world it may be. By providing tailored solutions, we ensure that each building functions optimally and meets the needs of our clients. Our team of experts is ready to deliver innovative and efficient solutions that perfectly fit the unique circumstances of each project. At Wopereis, your success in agricultural construction is our top priority, wherever you are located.

From sketch to finishing touches

For us, turn-key means more than just delivering a project. It means we handle everything in-house from the initial sketch to the final finishing touches. This includes design, construction, equipment installation, and construction handover. Our clients can trust that their project is in good hands and that we ensure a seamless and efficient transition to the operational phase.

Specialists in dairy farm construction

Building dairy farms requires specific knowledge and experience. At Wopereis, we understand that every dairy farm is unique and that client and location requirements can vary greatly. That's why we offer customized solutions that perfectly meet the client's needs. From ventilation systems to insulation, and from barn layouts to animal comfort, we make sure everything is perfectly arranged.

Expertise in Dairy Farming

In addition to dairy barn construction, we specialize in dairy farming. We know what it takes to set up a modern, efficient, and sustainable dairy farm. Our solutions include milking parlors, feeding systems, manure

handling, and automation. By utilizing the latest technologies and best practices, we help dairy farmers optimize their operations and increase productivity.

A Team of Experts

At Wopereis, we work with a dedicated team of professionals who master every aspect of the construction process. Our teams collaborate closely to ensure each project is completed on time, within budget, and to the highest quality standards. We believe in a customer-centric approach and strive to meet and even exceed all expectations.

Service

Our expertise extends beyond Dutch national borders. Wherever our clients are located in the world, we are ready to support them with our turn-key solutions. Thanks to our international experience, we can respond to the specific challenges and requirements of different markets and climates.

About us.

With over 90 years of experience, Wopereis stands as a leader in the agricultural construction industry, offering comprehensive solutions encompassing every aspect of farm development. With a deep commitment to quality and innovation, Wopereis ensures that each project meets the highest standards of excellence.

Integrated services

From initial design to final construction, Wopereis manages every stage of your project. This includes architectural planning, structural engineering, and complete building execution.

Expertise in agricultural construction

Specializing in the construction of dairy barns, Wopereis provides tailored solutions that optimize animal welfare and productivity. Our expertise extends to the design, calculation, production, and construction of high-quality steel structures and complete farms.

Advanced agricultural systems

Wopereis excels in developing and installing state-of-the-art barn interiors and automation systems. This includes automatic manure scrapers and feed pushers, ensuring efficient and sustainable farm operations.

Automated milking solutions

With in-depth knowledge of automated milking systems, Wopereis offer customized milking solutions that enhance dairy production and animal health.

Sustainable storage systems

Wopereis designs, produces, and installs durable manure storage and cover systems, adhering to strict environmental standards. Their solutions are both efficient and environmentally friendly.

Comprehensive project management

From obtaining necessary permits to coordinating construction timelines and budgets, Wopereis' project management expertise ensures smooth and timely project delivery.

Customer-Centric approach

Wopereis is dedicated to providing exceptional customer service, offering continuous support and maintenance to ensure the long-term success of your agricultural investments.

Total solution provider

Choose Wopereis as your total solution provider and experience the benefits of working with a partner that combines innovation, expertise, and a commitment to excellence in every
